CUTTING & GRINDING RANGE

We offer one of the most comprehensive bonded abrasives ranges available in the UK market. Our signature Cutting, Grinding & Extra Thin discs are available in a range of quality levels and sizes for use on a wide range of applications. We also offer an extensive range of specialist products including Rail Products, Vitrified Wheels and our Hybrid Cutting & Grinding Range offering maximum efficiency, versatility & performance.

CUT AND GRIND

PRODUCT DEMONSTRATION VIDEO

DISC TYPES & APPLICATIONS

We stock a comprehensive range of premium quality Cutting, Grinding and Extra Thin Discs available for every application.

RANGE INFORMATION

All Abracs discs are subject to our rigorous quality control procedures and are manufactured to European safety standards. We have classified the range into 3 star, 5 star and 'Black Edition' quality levels & application types to make selecting the right product as easy as possible.

ABRASIVE CUTTING DISCS

Our Cutting Discs offer consistent and smooth cutting, maximum product lifespan, performance and quality. Available in a comprehensive range of sizes for a wealth of applications including metal, stone, stainless steel and aluminium cutting supplied in both Proflex and Phoenix quality levels.

ABRASIVE GRINDING DISCS

Our Grinding Discs offer heavy duty abrasive grinding, excellent performance and incredible product life. Available in a comprehensive range of sizes for a wealth of applications including metal, stone, stainless steel and aluminium grinding supplied in both Proflex and Phoenix quality levels.

EXTRA THIN CUTTING DISCS

Our Extra Thin Cutting Discs are INOX, designed for fast and precise low vibration cutting. They are both high performance and long lasting. Suitable for a wealth of metal cutting applications including stainless steel available in Proflex Trade, Phoenix Pro & Black Edition Expert quality levels.

QUALITY LEVELS

PROFLEX

PROFLEX TRADE Cutting, Grinding and Extra Thin Discs are extended performance, professional quality products manufactured using high quality materials with an attractive price-performance ratio for the price conscious consumer.

PHOENIX

PHOENIX PRO Cutting, Grinding and Extra Thin Discs are ultimate performance, produced to O.S.A. Safety standards & manufactured using premium quality materials, giving excellent life, offering one of the best cost per cut ratios in the market.

BLACK EDITION

BLACK EDITION EXPERT Extra Thin Discs are 30% Extra Performance, reduced vibration & ultimate performance, produced to O.S.A. safety standards & manufactured using premium quality materials, our highest quality cutting disc produced to date.

APPLICATION GUIDE

METAL

Metal cutting discs are suitable for a wide range of metal applications including mild steel, iron, sheet steel & construction steel.

STONE

Stone cutting discs are suitable for a wide range of stone applications including natural stone, concrete, bricks & tiles.

INOX

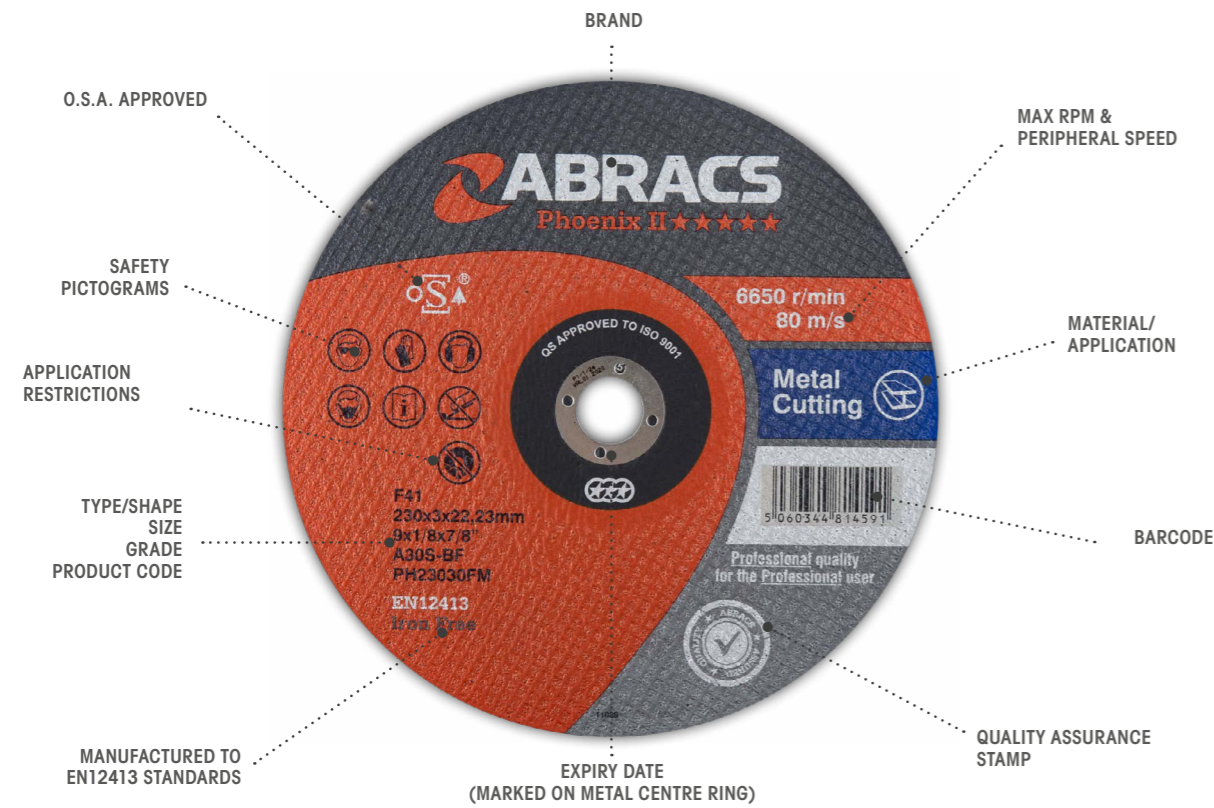

INOX cutting discs are specially designed for use on stainless steel as well as a wide range of non-ferrous metals.

ALUMINIUM

Aluminium cutting discs are specially designed for use on Aluminium as well as a wide range of non-ferrous metals.

ABRASIVE MARKING SYSTEM

Training and additional information on the safe use and fitting of abrasive wheels is available from Abracs.

CUTTING DISCS PROFLEX & PHOENIX

Abracs Cutting Discs are available in both Proflex Trade & Phoenix Pro quality levels for metal & stone applications in an extensive range of sizes. Our experience in manufacturing processes developed over nearly 3 decades, combined with the use of premium quality raw materials enables us to produce cutting discs with significant increases in product lifespan, performance and quality. All Abracs cutting discs are manufactured to European safety standards and marked with EN12413.

PROFLEX

Proflex discs offer professional quality performance and are a great value product, priced competitively with an exceptional cost per-cut ratio.

PHOENIX

Phoenix discs are produced to O.S.A. Safety standards. Manufactured using premium quality materials, Phoenix II discs offer ultimate performance, long life & outstanding value.

If you need any help selecting a disc for a specific machine or application contact the Abracs team.

Bulk rates are available for outer quantities and volume orders. Ask the team for details.

SAFETY ICONS

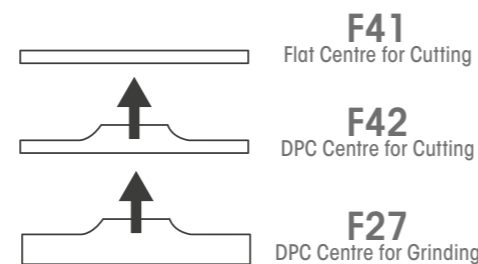

GRADE EXPLANATION

SHAPE EXPLANATION

Abrasive discs are available in several different types, the most commonly used are shown below.

ABRASIVE WHEEL TRAINING

As part of our on-going commitment to quality and safety we are now offering Abrasive Wheel Training courses as an additional service to our customers and wider end-user market. Legislation regarding the supply, fitting and use of abrasive wheels has changed significantly in recent years making it difficult for employers and operators of abrasive wheels to be clear on their legal requirements.

We currently have 3 fully trained and accredited Abrasive Wheel Trainers on hand to deliver the the training that will provide you with the basic skills and knowledge that are required to operate abrasive wheel machines in a safe and efficient manner.

Contact the Abracs team for more details.

GRINDING DISCS PROFLEX & PHOENIX

Abracs Grinding Discs offer heavy duty abrasive grinding, professional performance and outstanding product life. Available for both metal & stone applications in a comprehensive range of sizes to suit a wide variety of working machines. All Abracs Grinding Discs are manufactured to European safety standards and marked with EN12413. Proflex Grinding Discs are an incredibly good value product with an exceptional cost per cut ratio. Abracs Phoenix Grinding Discs are produced to O.S.A. Safety standards and are a premium quality European manufactured product. We have clear and easy to read specification information on our disc labels and product features listed on the box to make product selection easy.

Bulk rates are available for outer quantities and volume orders. Ask the team for details.

PROFLEX EXTRA THIN CUTTING DISCS

Proflex Extra Thin are an incredibly good value product with an exceptional cost per cut ratio. Manufactured to European quality standards, a high performance disc designed for speed, accuracy and long life. Our Proflex Extra Thin Discs do not contain iron, sulphur or chlorine so are suitable for stainless steel cutting applications.

Proflex 115mm x 1.0mm Extra Thin discs are supplied in both tins of 10 & 25's, see the table for details.

Bulk rates are available for outer quantities and volume orders. Ask the team for details.

NEW

3 QUALITY LEVELS

The range has been split into 3 clear categories, 3 Star Proflex Trade, 4 Star Phoenix Pro & 5 Star Black Edition Expert. The 3 tier quality system comprehensively covers the demands of the professional market with each option offering a perfect balance of performance & value to an extensive range of customers.

PHOENIX EXTRA THIN CUTTING DISCS

Our Phoenix discs are one of our signature products. A superior quality European manufactured range of extra thin cutting discs produced to O.S.A. Safety standards. Extremely fast and precise cutting with minimal effort required. Phoenix discs have been developed for precision cutting sheet metal and with strengthened core stability for reduced vibration. Our Phoenix Extra Thin Discs do not contain iron, sulphur or chlorine so are suitable for stainless steel cutting applications.

Phoenix 115mm x 1.0mm Extra Thin discs are supplied in both tins of 10 & 25's, see the table for details.

EXPORT

As an Export Customer your account will be personally managed by our Export Team. They will ensure that you are completely satisfied with your service at Abracs and work together to build up a loyal customer base.

We pride ourselves on offering a flexible and approachable service to global customers. We offer exceptional customer support including frequent in country visits, product training, tailored freight solutions and flexible terms options

We have invested heavily in our export services and we are looking for the right export partners to distribute the UK's No.1 abrasive consumables brand. With Abracs you can stand out from your market by stocking an extensive range.

“ I have been working with Abracs as an exclusive distributor within our national market over the last 24 months. I look forward to our continued relationship, Abracs have always provided great products and service while still managing to offer very competitive pricing. **”**
Industrial Distributor, Netherlands

We are always keen to further expand our overseas customer base and would welcome any enquiries from distributors who would be interested in introducing the Abracs brand into their local market

MULTI MATERIAL 5-IN-1 CUTTING DISCS

The "5 in 1" Multi Material disc has been designed for cutting applications on virtually all materials including metal, stone, stainless steel, aluminium and plastic/PVC. Professionals using this disc will no longer need to change discs for different materials leading to higher productivity, reduced product issues and increased operator safety.

- Multi Material 5-in-1 Discs can greatly improve efficiency on site.
- Multi Material 5-in-1 discs are a new product to the UK market contact the Abracs team for additional sales support to help promote the benefits to your customer base.

MULTI-PURPOSE 3-IN-1 DISCS

The "3-in-1" Multi Purpose disc can be used for cutting, grinding and finishing applications simply by altering the angle at which the disc is used. 90 degrees for cutting, 30 degrees for grinding and 15 degrees for finishing. An extra layer of reinforcing has been added to the disc to ensure that it can cope with additional side pressure from grinding. The disc is also INOX (iron, sulphur and chlorine free) meaning that it can be used on stainless steel without any risk of material contamination or rust formation.

- Multi Purpose 3-in-1 Discs can greatly improve safety on site.
- Multi Purpose 3-in-1 discs are a new product to the UK market contact the Abracs team for additional sales support to help promote the benefits to your customer base.

NON-WOVEN FLAP DISCS

Non-Woven Flap Discs discs are premium quality, manufactured using strengthened synthetic fibre and bonded by a specialist smear resistant adhesive which prevents clogging. This product is specifically designed for cleaning, polishing & finishing a wide range of materials. Available in 3 levels of coarseness to suit a variety of applications.

Staggered flap design increases usable surface area and increases performance over flat non-woven discs.

POLY PRODUCTS RANGE

With our Poly Disc range you can bring old and rusty materials back to their former glory without damaging the applications surface. They are a unique and versatile product designed for removal of rust, paint, thermal blueing and other contaminants. Made from a non-woven nylon web covered in a specialist synthetic resin. Poly Products can be used on a wide range of applications including metal, wood, concrete, aluminium and stainless steel.

POLY PRODUCTS

Abracs ultimate performance Poly Products have a unique structure and synthetic resin coating which enables effective removal of rust, paint, thermal bluing and other contaminants. The lightweight fibreglass backing absorbs vibration and makes this product incredibly strong and durable. The design of these unique products ensures a minimal risk of scratching the work piece. Suitable for a wide range of materials. The poly discs are for use on angle grinders, while our Spindle Mounted Wheels are for use on air tools.

Blue poly discs are denser and more suitable for harder surfaces such as concrete and stone.

Bulk rates are available for outer quantities and volume orders. Ask the team for details.

HUB CLEANING TOOL

The Abracs Brake Hub Cleaning Kit product gives operators a quick and effective means of removing rust from the brakes, rotor and hub. The anti-clogging design keeps the abrasive minerals cutting at higher performance. The system removes rust and corrosion quickly, even in hard to reach places. The attachment provides quick disc changes with the convenience of running on high-speed tools. All this adds up to saving time, increasing speed and effectiveness.

SAW BLADES RANGE

Abracs Saw Blades can be split into two categories. The TCT Blades range is precision manufactured, professional quality and available in an extensive range of sizes, cut types and tooth configurations suitable for use on a wide range of wood applications for all applicable machines. Polycrystalline Diamond (PCD) Saw Blades designed for effortless and efficient cutting of Fibre Cement boards and other specialist materials. They have significantly longer life than a traditional saw blade with faster, cleaner & more accurate cutting.

CUT AND GRIND

PRODUCT DEMONSTRATION VIDEO

TCT BLADES WOOD

Abracs TCT Blades are manufactured with Tungsten Carbide tipped teeth for wear resistance and extreme lifetime. The fully hardened plate offers precision accuracy while the expansion slots eliminate the risk of warping. Abracs Cordless TCT Blades are manufactured with an Extra Thin Kerf & lightweight body for use on Cordless Circular Saws to improve battery life. For use on most wood material applications. The teeth configurations determine the speed and finish of the cut. Blades with fewer teeth cut faster while those with more teeth create a finer finish.

- i** All TCT Blades supplied with bore reducers.
- i** (Cordless) 165mm Blades are manufactured with a thinner kerf and lightweight body for use on Cordless Machines.

SWEDEX

SAW BLADES

PART OF THE ABRACS GROUP

Swedex is an international supplier of premium quality, Swedish manufactured TCT Saw Blades.

Our UK stock holding covers virtually all cutting applications for all machines and materials.

All blades can be modified to suit specific machines using our in-house modification service which can be typically offered on a same day, free of charge basis.

With over 20 years' experience in the market we are well placed to offer advice, guidance and support to our loyal customer base and can assist with bespoke/unique projects and blades.

The premium quality of our saw blades ensures consistent performance and results every time and is one of the many reasons why so many customers choose us as their preferred saw blade supply partner.

WHAT SWEDEX OFFER

PRODUCT QUALITY AND CONSISTENCY UTILISING SWEDISH MANUFACTURING EXPERTISE

BLADES AVAILABLE FOR VIRTUALLY ALL MATERIALS INCLUDING WOOD, ALUMINIUM, STEEL, PLASTICS/UPVC AND SPECIALIST/UNIQUE APPLICATIONS

IN-HOUSE BLADE MODIFICATION SERVICE AVAILABLE WITH SAME DAY TURNAROUND AND LOW COSTS (ALSO AVAILABLE FOR NON-SWEDEX BLADES)

WIDEST RANGE OF SAW BLADES AVAILABLE IN THE UK

REPUTABLE NAME/BRAND IN THE INDUSTRY WITH OVER 20 YEARS' EXPERIENCE.

HIGHEST STOCK HOLDING AVAILABLE IN THE UK

DISTRIBUTION ONLY ROUTE TO MARKET

ALL BLADES INDIVIDUALLY TESTED & APPROVED AS PART OF THE PRODUCTION PROCESS.

LONG LIFE CARBIDE USED ON ALL BLADES

DIAMOND CUTTING PRODUCTS

Abracs specialise in ultimate performance, expert quality Diamond cutting products design and manufacture. We have a comprehensive range of innovative Diamond Blade solutions for all construction & industrial market needs. Developed over 30 years of market expertise. Abracs precision manufacture and modern quality control methods allow us to control and regulate the variables that affect blade life, quality of cut and product performance. The range also includes Expert quality Diamond Cores for use on a wide range of applications. Within the range we offer a full range of individual cores in the most popular market sizes and a range of specialist kits containing a range of popular cores and all the accessories you need.

DIAMOND BLADE TERMINOLOGY

 <p>COOLING HOLES Added visibility when cutting, and ensures heat dispersion and swarf removal for maximum yield out.</p>	 <p>CONTINUOUS TURBO RIM The castellation of the blade traps air in motion guaranteeing less chipping and faster cuts.</p>	 <p>ANGLED TURBO SEGMENT The angled turbo segment easily removes debris and helps cool the blade more efficiently.</p>
 <p>KEYHOLE GULLETS Ensures less chipping of the material being cut and reduces vibration levels.</p>	 <p>NARROW GULLET Narrow gullets ensure less chipping of the material, reduce vibration levels and minimise the chance of segment loss.</p>	 <p>UNDERCUT TECHNOLOGY Specific segment design 'undercut technology' increases water flow and protects the segments from increased wear.</p>

PRO-X ★★★★★ GENERAL CONSTRUCTION MATERIALS

Abracs Pro-X General Construction Materials Diamond Blades are designed for maximum performance and long life. Suitable for cutting virtually all construction materials including steel and reinforced concrete. The 10mm continuous segment eliminates the chance of segment loss and cooling hole technology reduces cutting temperature and increases user visibility for enhanced safety. Manufactured using quality diamonds and a strengthened, pre-stressed metal body.

EXPERT ★★★★★ ABRASIVE CONSTRUCTION MATERIALS

Designed with a thicker core that resists flexing and provides a straighter cut, this versatile blade can slice through asphalt and green concrete and can also be used on medium to soft materials such as sandstone and breeze blocks. Undercut protection technology protects the segment from abrasion, reducing the risk of segment loss and increasing product life. Laser welded segments ensure maximum strength, performance and reliability. Extra wide gullets aid stock removal and add further protection to the segments during the cutting process.

WET DIAMOND CORE BITS

Wet Diamond Cores are manufactured with high concentration segments with premium quality coated diamond grain. Excellent working life, speed and performance. Wet core bits help control dust by flushing out the cuts, which will help your core last longer. Comprehensive range of sizes to suit all requirements.

COBALT HOLESAWS

Abracs extensive range of expert quality Cobalt Holesaws for use on a wide range of applications. Our Cobalt Holesaws are designed for use by professional trades people and manufactured from premium quality materials. We use Bi-metal construction with 8% Cobalt for extreme strength, durability and performance. Abracs Holesaws are manufactured with high speed variable pitch teeth for fast and clean cutting and are suitable for use on a full range of materials.

i All Abracs Cobalt Holesaws are manufactured with a cutting depth of 38mm. **i** Abracs Holesaws are to be used in conjunction with a compatible size holesaw arbor. **>>>** Turn to page 50 for our Range of Holesaw Kits & Accessories.

HSS TITANIUM DRILL BITS

Abracs HSS Titanium Drill Bits are precision ground for high performance. The reduced friction created by the Titanium Coating means these Drill Bits can last up to 3x longer than standard HSS Drill Bits and are suitable for drilling a wider range of materials including Metal, Wood, Plastic and Stainless Steel. A key performance feature of Abracs HSS Titanium Pilot Drill Bits is their Split Point cutting head. The Split Point allows the drill bit to instantly grip the material resulting in higher precision, accuracy and significantly faster drilling speeds.

i The precision split point allows the drill bit to instantly grip the material resulting in higher precision, accuracy and significantly faster drilling speeds.

HSS COBALT DRILL BITS

Abracs HSS Cobalt Drill Bits are precision ground for high performance. The addition of 5% cobalt into the High Speed Steel increases lifetime, strength & wear resistance, keeping the drill bit sharper for longer. A key performance feature is their Split Point cutting head. The Split Point allows the drill bit to instantly grip the material resulting in higher precision, accuracy and significantly faster drilling speeds.

- i** The precision split point allows the drill bit to instantly grip the material resulting in higher precision, accuracy and significantly faster drilling speeds.
- i** The addition of 5% cobalt increases lifetime, strength & wear resistance keeping the drill bit sharper for longer.

HSS COBALT DRILL BITS KITS

Abracs HSS Cobalt Drill Bits Kits are available in 19 & 25pc Kits including all popular sizes to suit all drilling applications. Supplied in a handy and durable metal case.

- i** The precision split point allows the drill bit to instantly grip the material resulting in higher precision, accuracy and significantly faster drilling speeds.
- i** The addition of 5% cobalt increases lifetime, strength & wear resistance keeping the drill bit sharper for longer.

FOR USE ON	HARDENED STEEL	ALLOYS	CAST IRON	STAINLESS STEEL

19pc HSS Cobalt Drill Bit Set Contents: 1-10mm (0.5mm Increments)	1	DBCCKIT19	£72.36
25pc HSS Cobalt Drill Bit Set Contents: 1-13mm (0.5mm Increments)	1	DBCCKIT25	£151.50

HSS-G DRILL BITS

Abracs HSS-G Drill Bits are precision ground for high performance. Best suited for use on common steel material applications, but will also cut plastic. Manufactured with a Split Point allowing the bit to instantly grip the material resulting in higher precision, accuracy and increased drilling speeds.

- i** HSS-G Long Series Range available on Page 56

3pc Step Drill Set - 4-12mm, 4-20mm & 6-30mm	1	SDKIT3	£90.35

COUNTERSINKS

Abracs Countersink Bits are manufactured from high speed steel with a 90° cutting edge for ultimate performance. The precision ground flutes ensure that the three edged cutters are extremely sharp & durable. The BRAND NEW Countersink Drill Bits are designed to give you a countersunk hole without the need for a separate drill bit & countersink reducing product downtime and increasing efficiency.

FLAT WOOD DRILL BITS

Sometimes known as a Wood, Spade or Dowel Bit, the Abracs Flat Wood Drill bits are manufactured with extra hardened steel, featuring a central point & two raised spurs to keep the bit straight during drilling. A precision ground cutting face for high performance and a quick-chuck fitting for fast and easy bit change throughout any drilling job.

i Available in Standard length or as part of our Flat Wood Long Series Range

BRAD POINT DRILL BITS

Abracs Brad Point Drill Bits feature a precision point, providing accurate positioning for the bit when starting the hole. These bits are precision ground, making them excellent for use in furniture making, dowelling, cabinetry and other woodworking applications where an exact hole size is required. The spur cutting edges reduce splintering and ensure a smooth, clean and precise exit hole with no blow out. Supplied in plastic pouches.

i The spur cutting edges reduce splintering and ensure a smooth, clean and precise exit hole with no blow out.

AUGER DRILL BITS

Abracs Auger Drill Bits are spiral shaped, designed to produce clean, deep holes in wood material applications. Sharp spurs at the tip guide the bit into the wood ensuring a smooth and uniform hole throughout. Manufactured with high grade carbon steel and a centre point with screw resulting in less downward pressure being required for them to bite into the work piece. The wide deep flighting of these bits allows efficient removal of wood shavings and prevents the hole from becoming clogged. Supplied in a plastic tube.

i The wide deep flighting of these bits allows efficient removal of wood shavings and prevents the hole from becoming clogged.

TILE PRO DRILL BITS

Abracs Tile Pro Drill Bits are built with a TSM carbide tipped head for precise drilling and added strength. The asymmetric tip has been diamond ground enabling drilling in granite, ceramics, fine stoneware and marble.

- Manufactured with a triangular shaped shank guarantees no slip rotation in the drill chuck.
- For best results use at constant pressure at a consistent and slow speed.

SDS+ 4-CUTTER MASONRY DRILL BITS

Abracs SDS+ 4-Cutter Masonry Drill Bits feature the addition of rebar guards and 90° 4-cutter head providing increased durability in hard aggregate compared to standard SDS+ Bits. The solid carbide tip allows for precise drilling and added strength when cutting into the surface of the material. The hardened steel body reduces the chance of breakages, increasing product longevity. A precision ground dual flute design enables easy dust and debris removal from the hole and significantly increases drilling speeds.

i The addition of rebar guards and 90° 4-cutter head provide increased durability in hard aggregate.

8PC MULTI-PURPOSE DRILL BIT SET

8pc Set featuring a range of the most popular sizes of Multi-Purpose TCT Drill Bits to suit virtually all applications, packed in a handy and re-usable carry case.

i Manufactured with a tungsten carbide tip (TCT) for precise drilling and added strength and a Diamond Ground cutting edges to enable multi-purpose drilling through virtually all construction materials.

IMPACT SCREWDRIVER BITS

Abracs Impact Screwdriver Bits are manufactured with S2 Premium Steel for long life and are suitable for all heavy duty screw driving applications. The addition of the torsion zone alleviates the stress & pressure put on the bit during drilling increasing endurance, product life and overall performance.

Specification	Pack Qty	Product Code	List Price
25mm Impact S/D Bit - PH2 (5pc Blister Pack)	1	IPH22505	£3.94

42PC IMPACT S/D BITS KIT

Abracs 42pc Impact Screwdriver Bit Kit contains a range of popular sized Impact Bits and accessories in a wide range of head types to suit a broad range of screw driving applications. The torsion zone on each bit alleviates the stress & pressure put on the bit during drilling increasing endurance, product life and overall performance.

Abracs Impact SD Bits are specially designed for use with impact drivers.

Supplied in a 6pc P.O.S Display Box as standard.

SCREWDRIVER BITS

Abracs Screwdriver Bits are manufactured with S2 Premium Steel for long life and are suitable for all heavy duty screw driving applications. Measuring 25mm in length they are available in a range of Head types.

Specification	Pack Qty	Product Code	List Price
25mm Screwdriver Bit - PH2 (25pc Tub)	1	PH225	£7.90
25mm Impact S/D Bit - PZ2 (25pc Tub)	1	PZ225	£7.90
25mm Impact S/D Bit - PZ2 (100pc Tub)	1	PZ2100	£27.82

CARBIDE BURRS RANGE

Abracs Carbide Burrs Range is manufactured with High Performance Tungsten Carbide and Double Cut design. Available in a range of sizes & shapes, our 5pc Kit offers a selection of the most popular head types from our 6mm Spindle range. All Abracs Carbide Burrs are suitable for use on a variety of Materials such as Steels, Alloys and Cast Iron.

RECIP SAW BLADES METAL

Abracs Reciprocating saw blades for Metal are available in a range of tooth configurations and sizes. Blades are available for fast, precision or fine cutting in a selection of ultra flexible or heavy duty blade types. Manufactured using Bi-Metal, Abracs expert-line reciprocating saw blades for metal are ultimate performance, long life and premium quality. Suitable for use on a wide range of applications including sheet metal, pipes, profiles, tubing and box section. Every Abracs Reciprocating Saw Blade has a universal fitting for use on all popular machine types.

i All Abracs Reciprocating Saw blades have a universal fitting and are suitable for use on all popular machines.

RECIP SAW BLADES WOOD & METAL

Abracs Wood & Metal Reciprocating Saw Blades are available in a range of tooth configurations and sizes. Our Wood/Metal range is split for both fast cutting & coarse cutting a wide range of applications including sheet metal, nail embedded wood, wooden pallets, pipes, metal profiles & chipboard. Manufactured using Bi-Metal, Abracs expert-line reciprocating saw blades for Wood & Metal are ultimate performance, long life and premium quality. Every Abracs blade has a universal fitting for use on all popular machine types.

i All Abracs Reciprocating Saw blades have a universal fitting and are suitable for use on all popular machines.

QUICK LOCK RANGE

The Abracs range of "Quick-Lock" products can be used for cleaning, stripping, polishing and finishing all using the same simple system. Abracs twist on and twist off fitting means that different products can be fitted and removed quickly, safely and easily. This simple but innovative system means less downtime for operators and higher overall productivity.

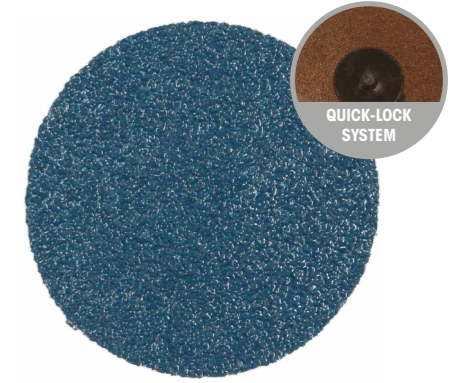

SANDING AND FINISHING

QUICK-LOCK SANDING DISCS

Zirconium sanding discs suitable for use on a range of materials including stainless steel. Ideal for use in hard to reach places.

i Quick-Lock discs should always be used with a Quick-Lock Backing Pad.

G Use desired grit listed in spec in highlighted area of the product code e.g. ABQLFD050**040** for **040g**

FOR USE ON	STAINLESS STEEL	SHEET METAL	MILD STEEL	HIGH GRADE STEEL

HOOK & LOOP GOLD SANDING DISCS

Industrial quality 150mm Hook & Loop Sanding Discs available with dust extraction holes or without. The aluminium oxide grain has a specialised stearate coating and a semi-open grit binding which prevents clogging and significantly increases the sanding speed. Suitable for general purpose sanding but specifically designed for applications involving paints, lacquers, putty and primers i.e. within the automotive industry. The heavy duty paper backing makes the product extremely durable and long lasting and the Hook & Loop backing ensures quick and easy changes on most brands of sanders.

G Use desired grit listed in spec in highlighted area of the product code e.g. ABHLG0150040 for 040g

i Gold Hook & Loop discs should always be used with a Backing Pad.
